

Open Science and centralized and administrative research assessment: an odd couple?

AISA responds to COARA's Call for Working Groups with its own proposal: "Open Science and centralized and administrative evaluation of research: an odd couple?"

The aim of the working group is to understand whether and how a centralized and administrative assessment of research, which evaluates its "products" in a zero-sum game, can be made compatible with Open Science.

The full text of the proposal is available here. COARA member organizations wishing to endorse and enhance it are most welcome.

You can reach us at aisa@aisascienzaperta.org .
